

B.VOC IN MEDICAL RECORD TECHNOLOGY

Duration :3 Year degree program UGC Approved Course

OVERVIEW

The Bachelor's degree in Medical Record Technology is a specialized program aimed at providing students with comprehensive education and training in managing and administering medical records and health information systems. Focused on preparing students for careers as medical record technicians, health information technicians, or medical coding specialists, the program covers various aspects of medical record management, including medical terminology, anatomy, disease processes, and pharmacology. Students also study health information management principles, including electronic health records, privacy, data analysis, and reimbursement systems. Through coursework, hands-on training, and clinical experiences, students gain practical skills in coding, database management, data integrity, and regulatory compliance related to medical record documentation and privacy.

OBJECTIVES

After completing this course, participants will be able to:

- They play a critical role in maintaining accurate and confidential medical records, facilitating communication between healthcare providers, and ensuring compliance with healthcare regulations and standards.
- Work in a variety of healthcare settings, including hospitals, clinics, physician offices, long-term care facilities, and insurance companies.
- Pursue careers as medical record technicians, health information technicians, medical coding specialists, medical transcriptionists, or health information managers.

PEDAGOGY

The pedagogical approach employed is characterized by its holistic nature, emphasizing a focused methodology that underscores the significance of scenario-based practical applications utilizing cutting-edge tools and techniques. There will be comprehensive lab work requiring demonstrated competency to receive a satisfactory grade.

COURSE CONTENT

- Human Anatomy & Physiology
- Forensic Medicine
- Introduction to Medical Record Science
- Medical Transcription & Telemedicine
- Hospital Administration
- Database Management System & data Quality

COURSE HIGHLIGHTS

- Classroom Training (Theory + Practical)
- Internship
- Eligibility - 10 + 2 (Any Stream)
